

CREATING A SPACE TO LEARN

Are you confident that your school's facilities maximise learning?

When we started working with schools over nine years ago, we became aware that the majority of traditional classroom designs were not best suited to the introduction of ICT equipment.

The installation of kitchen worktops around the room's perimeter, for instance, though functional, did nothing to support teaching styles or encourage interaction within the class.

Our room designs bear testament to the fact that effective design can stimulate children's creativity, provide comfort, security, personal space and nurture interest.

Tempus' team of dedicated specialists are able to create an environment specifically designed to incorporate ICT regardless of the current layout of a room. We can create rooms to reflect a specific theme for primary schools or a 'boardroom' for secondary schools. The only limit is your imagination!

Tempus has doubled the space in our ICT suite, which I didn't think would be possible. The environment is fantastic. It has transformed the way we use the room and the children now really enjoy having lessons in there. Tempus were great to work with and made sure everything was taken care of.

Ceri Crosskey

Head Teacher Gilbertstone Primary School

We have designed and installed customised suites at over 30 schools, including schemes that support up to 100 users.

As part of our service, we'll project manage every aspect of the design and installation of the suite, from the initial floor plans to the renovation and installation of furniture, fixtures, electrics and ICT equipment. Everything is taken care of for you.

Our full suite design service includes the following:

Bespoke desk and furniture design • Full redecoration • Floor renovation and replacement • Air conditioning installation • Lighting • Networking • Electrical installations • Seating

WHY TEMPUS?

We provide intelligent solutions that are accessible as well as secure.

We have expertise in designing individual classroom solutions catering from four to 100 pupils.

We manufacture offsite to minimise disruption.

We fully project manage all installations, providing you with the reassurance of a no hassle, complete solution.

We are able to create separate shared areas.

We can design adaptable spaces for dual use.

We are the only ICT provider to offer a complete design and installation solution.

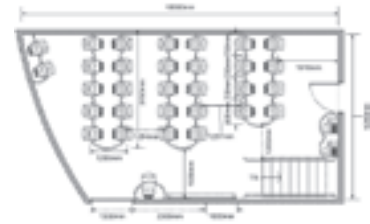

Creating a new suite revolutionises ICT capacity. Gilbertstone Primary School had an under resourced ICT room. With 450 pupils and an impractical space, the teaching and learning capacity was compromised, with classes having restricted access and limited interaction with ICT.

THE PROBLEMS

- Restrictive room layout, with capacity for just 15 desktop computers.
- Teaching capacity was limited as it was difficult to walk around the room, resulting in limited access to pupils.
- Access to ICT limited to just 30 minutes a week for each pupil.
- 0% dedicated one-on-one pupil ICT interaction.
- The room did not create a positive learning environment or stimulate pupils.
- The room was only utilised for approximately 12 hours per week.

THE SOLUTION

Tempus worked with a dedicated team at Gilbertstone, which included a panel of pupils. The company designed a bespoke room solution, managing and installing a complete new ICT suite into the existing space.

THE RESULTS

- 50%** increase in ICT resource.
- 100%** increase in capacity of room to house desktop computers.

- 100%** of pupils now have one-on-one interaction with ICT on a weekly basis.
- 100%** increase in teachers' capacity to carry out pupil assessments.

- 100%** increase of interaction with ICT across the curriculum.
- ICT suite is now used **75%** of the school day and is a primary resource for after school clubs and adult education classes.

HOW TEMPUS HELPED GILBERTSTONE PRIMARY SCHOOL

FEATURES	BENEFITS
Design of new layout for the ICT suite	<ul style="list-style-type: none"> • Increased capacity enabling the installation of an additional 15 desktop computers • Enabled teachers to move around the room and have easier access to every pupil • Allows teachers to carry out one-on-one pupil assessments.
From painting the walls to installing the server, Tempus delivered the complete renovation of the ICT suite	<ul style="list-style-type: none"> • Creating a stimulating and engaging space for teachers pupils and the community • All stages of the installation are managed and controlled by Tempus.
<p>Complete project management by a specialist Tempus team:</p> <ul style="list-style-type: none"> • Regular status meetings with Gilbertstone's nominated team • In-depth site surveys to develop the best solution and layout for the room • A complete network and server overhaul to maximise the effectiveness of the new suite • Supply and installation of latest hardware and software • Maximisation of off site work during the installation to minimise disruption • End of project review. 	<ul style="list-style-type: none"> • Reassurance that the solution would optimise the resources within the ICT suite • Confidence that the most up to date technology is utilised • School fully updated throughout process • Disruption minimised during installation • Satisfaction guaranteed.
